## **CPRE Hampshire Awards Scheme**

### **Category Criteria**

Please find below information regarding the criteria to assist you in your nomination for the CPRE Hampshire Awards Scheme. The scheme consists of three categories in which environmentally outstanding projects can be nominated. The three categories are:

- Schools Category;
- Voluntary and Community Category;
- Public Sector and Business Category.

For the schools category evidence will need to show: use of landscape as an opportunity for learning linked into the curriculum; a high level of pupil involvement; sensitivity to local ecology; and an awareness of sustainability issues. Evidence of the following will assist: parent involvement; the growing of food crops in gardens or allotments; management of a wildlife area; regular work by pupils on the project; the use of artwork as a learning tool; the use of recycled materials; involvement of the 5 senses; and the availability of disabled access. An example of an eligible project for this category is to be found at Warren Park School in Portsmouth. Further information can be found at <http://www.warrenpark.hants.sch.uk/>.

For the voluntary and community category evidence will need to show: the prioritisation of environmental conservation or restoration within the rural or urban environment; an awareness of sustainability issues; and evidence of strong links to the local community. Evidence of the following will assist: the involvement of volunteers from a range of social sectors and/or age groups; regular work on the project; the durability of the project; and local campaigning on the aims of the project. An example of an eligible project for this category is that which has taken place at Fullers Vale Wildlife Pond. See

<http://www.johnowensmith.co.uk/pond.index.htm>. and

<http://www.johnowensmith.co.uk/pond/photos.htm>.

The public sector and business category is open to business and council sector activities affecting the rural environment in Hampshire. Evidence will need to show tangible progress towards tackling one or more of the core CPRE issues. These include conservation of the countryside, light pollution; loss of tranquillity; fly tipping; roadside clutter; and the promotion of local foods. See [www.cprehampshire.org.uk](http://www.cprehampshire.org.uk) for further details regarding CPRE values. Evidence of a significant contribution to the quality of life of a local community will assist nominations. The CPRE is very much in favour of the promotion of local foods, and Hampshire Fare is a prominent organisation representing local food producers. For more information refer to <http://www.hampshirefare.co.uk>.
